Slide 2: What you need

- Have students take out their planner, a piece of lined paper and something to write with.

Slide 3: Watch the video on study tips

Slide 4: Directions

- Have students write on the top of their paper Study Tips:
- You will go through the 9 study tips with them on the next slides. Have them leave some space between the tips so they can fill in what their plan is.

Slide 5: Tip 1: Chunking

- Tell students that it is important to break study sessions into short chunks of time. Cramming for a test the night before does not have a positive outcome.
- Have students look at their planners for any up coming tests or quizzes. Have them on their piece of paper under this tip, write down how they are going to break the material into smaller manageable chunks. (Feel free to give examples of how you could do this in your class)

Slide 6: Tip 2: Routine

- After students write down this tip, have them pick a time that would be great for them to study (during the day!). Have them record the time they are going to study on their paper, and ask them to try to stick to this plan for the next couple of weeks.

Slide 7: Tip 3: Flashcards

- These are an excellent memory reinforcement tool. Tell students that they will have time at the end to get on quizlet if they would like to explore!

Slide 8: Tip 4: Goal Setting

- Remind students of step 1, breaking material into chunks. Have them write down the chunk they plan on studying tonight in their planners!

Slide 9: Tip 5: Teaching!

- Students have an easier time remember material if they have to teach it to someone else instead of just memorize information. At the end give students time to work on creating a mini lesson for the topic they chose to study in the previous step

Slide 10: Tip 6: Practice, Practice, Practice

- Remind students that we provide them with lots of study materials prior to tests and quizzes. They should be checking blackboard and google classroom prior to tests and quizzes and do the materials teachers have provided to them!
- Students can create their own practice quiz after this lesson!

Slide 11: Tip 7: Where to study

- Have students write in their planners a good place to study, and a reminder that they should go home tonight and set this location up! Give some examples of where you like to study!

Slide 12: Tip 8 and 9: Get rid of distractions!

- Remind students that we are not focused on the task at hand when our cell phones are in our line of sight. We are easily distracted by incoming snapchat, texts and messages. Put the distractions away and use them as a reward after your 20-30 minute study sessions.

Slide 13: Try it out!

- Give students time to make a plan on how they are going to tackle studying for their next assignment! Have them share their plans with their group members!
